DETAILED ACTION

This is an allowance for application no. 09/853,508 in response to the amendment filed on October 19, 2004 in which claims 1-36 are presented for examination.

Response to Amendment

Applicants' arguments, see Pages 16-18, filed October 19, 2004, with respect to claims 1-33 have been fully considered and are persuasive. The rejection of claims 1-33 has been withdrawn.

Allowable Subject Matter

Claims 1-36 are allowed.

The following is an examiner's statement of reasons for allowance:

With regards to independent claims 1, 6, 11, 17, 31 and 32, the claims pertain to a novel method and computer code for computing an average bits/frame for frame extracted from a buffer used for video encoding and decoding that the examiner was unable to find in several prior art searches. The claims require the use of BA (bits/frame) equal to $(BR+BR1/J1)/J2$ where BR1, J1, and J2 are each positive integers. Further, the claims require the comparing of two accumulators with the variables J1 and J2 in order to determine BA. These features taken with the others in the claims define over the prior art.

With regards to independent claims 23 and 27, the claims pertain to a novel method and computer code for computing a value Z output by an output device. The claims require the use of a set of variables and calculation that were unable to be found

in several prior art searches. These variables and calculations taken with the other requirements of the claims define over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
